Mobile: +91 9392455148

Education

Sagi Rama Krishnam Raju Engineering College, Bhimavaram 2021 - 2025
B.Tech, Computer Science And Engineering ***CGPA: 9.23***

Internships

ML Intern July 2023 – September 2023
Henotic Technology pvt ltd, Hyderabad

- This involved implementing machine learning concepts to develop and enhance algorithms for predicting the values.
- The experience allowed me to gain practical insights into real-world problem-solving within the insurance domain while working closely with a dedicated team of professionals..

Software Developer Trainee May 2023-July 2023
Pradhan Mantri Kaushal Vikas Yojana(PMKVY)

- Completed a comprehensive training program in software development under the PMKVY scheme, equipping myself with fundamental skills and knowledge essential for a career in software development. .
- As part of the program, I gained hands-on experience in various programming languages, web development, database management, and software engineering principles.

Skills

Languages : Java ,Python , SQL
Technologies : MERN Stack, Machine Learning,Deep Learning ,NLP,Spring Boot, REST APIs
Tools : IntelliJ IDEA, Visual Studio Code, ,GitHub, Postman, Vercel

Projects

TP Cell Blog *MERN stack*

- The platform serves as a centralized hub for students to share their experiences during campus placements, offering insights into the recruitment process and tips for future candidates.
- The blog also provides timely updates on companies visiting the campus, job opportunities, and placement statistics, helping students stay informed and better prepare for interviews.

E-commerce Website *Java Full Stack (Spring Boot, React)*

- Designed and implemented a full-stack e-commerce website with features such as product catalog, shopping cart, and order management.
- Leveraged Spring Boot for backend APIs, integrated database persistence, and built a responsive frontend for seamless user experience.

Hospital Management System *Java Full Stack (Spring Boot, React)*

- Developed a hospital management system with modules for patients, doctors, bills, and appointments.
- Implemented RESTful APIs using Spring Boot, Hibernate/JPA, and MySQL, and built a responsive frontend with React.

Employee Promotion Prediction *Machine Learning using Python*

- Developed a machine learning model using Python for employee promotion prediction based on performance and demographic factors.
- The model achieved 94% accuracy, assisting organizations in making data-driven, merit-based promotion decisions.

Certifications

- AICTE certified Machine Learning Certificate from AWS Academy.
- HENOTIC TECHNOLOGY certified ML Internship Certificate.
- NPTEL certified Data Structures and Algorithms Using Python.
- HackerRank Certified in Python.
- HackerRank Certified in Java.
